Max Q

ROADFLOW PROGRAM

This program is written for Microsoft Excel.

On boot up, use the zoom buttons to centre the working area of each of the sheets in your screen.

When satisfied with the look save the program for future use. To place a shortcut on your desktop go to the saved file then: *Right click – Send to – Desktop*.

Before use browse quickly through the help file to become familiar with the program's capabilities.

Use
The program is based on the Izzard Equation (See Max Q web site Drainage Design – Roadway Flow) which is a form of the Manning formula adapted to flows in a triangular channel. Characteristics of all types of roadway flow may be investigated using this program. It is particularly suited for drainage design according to Qudm.
